Deepshikha

Product-Minded Technologist | Aspiring Product Manager

d.shikha0893@gmail.com | +91 90926 90893 | Bengaluru, Karnataka | deepshikha2506

PROFESSIONAL SUMMARY

Product-focused technologist with 5+ years in roadmap execution, cross-functional stakeholder alignment, user research, and GTM delivery across AI and distributed platforms. Currently driving product strategy, KPI definition, and cost optimization for a Voice AI product used in 1M+ daily interactions—delivering 30% latency reduction and 20% cost savings. PM certification in Gen & Agentic AI (BITSoM) complements hands-on experience shipping GenAI features and writing PRDs, positioning for an Associate / Technical Product Manager role.

CORE STRENGTHS

- **Product & Delivery:** Product Roadmap Ownership, User Research, PRD Writing, Go-To-Market Strategy, Stakeholder Management, KPI & OKR Definition, Competitive Analysis, Tradeoff & Prioritization Frameworks (MoSCoW), 0→1 Feature Delivery
- **AI / Conversational Systems:** LLM Orchestration & Routing, Tool-Calling Reliability, ASR/TTS Evaluation, Prompt Engineering, GenAI Product Development, Voice AI Product Design
- **Engineering Foundation:** Python, Java, SQL, REST APIs, Microservices, Kafka, Airflow, CosmosDB, Pinot, Oracle
- **Analytics & Reliability:** Root Cause Analysis, A/B Testing Fundamentals, Splunk, Grafana, Kibana, BigQuery, Metrics Monitoring

WORK EXPERIENCE

Customer Success Engineer II – AI Services *Jul 2025 – Present*

Meesho Technologies Pvt. Ltd. *Bengaluru, India*

- Owned product roadmap prioritization and backlog scoping across **3** enterprise Voice AI accounts, partnering with engineering and cross-functional teams to align on GenAI feature delivery.
- Led user research and technical discovery for Meesho's first enterprise account, translating customer feedback into a phased go-to-market plan that took the product from pilot to production in **2 weeks**, unlocking **20%** of team enterprise revenue.
- Identified latency as the top driver of user churn through funnel and feedback analysis; evaluated caching vs. routing tradeoffs and drove cross-team alignment on a dynamic model-routing strategy, cutting latency **30%** and lifting conversational completion rates.
- Defined and standardized core product KPIs (STT/TTS accuracy, LLM tool-calling reliability, p95 latency) to inform data-driven roadmap and sprint prioritization decisions.
- Ran a cost-vs-quality competitive analysis across ASR/TTS vendors and proposed an in-house LLM migration strategy, reducing unit cost per call by **20%** while holding quality constant.
- Redesigned observability and escalation frameworks based on stakeholder pain points, cutting alert noise **80%** internally, **60%** externally, and eliminating SLA breaches.
- Instituted structured root-cause-analysis processes with engineering leadership, reducing recurring incidents **40–60%**, and mentored **8** engineers on solution design and troubleshooting.

Technology Services Engineer II *2021 – 2025*

Walmart Global Tech India *Chennai, India*

- Analyzed customer friction in order-edit workflows and built the business case for an automated self-service capability, eliminating **100%** of related support ticket volume.
- Championed real-time production observability (Kafka, Splunk) to resolve slow incident detection, reducing mean time to respond (MTTR) by **40%** across distributed services.
- Owned the response strategy for critical production incidents during peak sales events, achieving **100%** on-time SLA mitigation.
- Spearheaded operational automation for repetitive troubleshooting workflows, cutting manual engineering effort by **60%**.
- Scoped and delivered resilient backend services and data pipelines (Java, SQL, Airflow) to support peak-load concurrency with zero downtime.

PROJECTS

TripGenie – Trip Planning App *PM Capstone – BITSoM*

- Conducted user interviews and competitive analysis across 15+ travel applications, uncovering a major drop-off during fragmented itinerary-to-booking transitions.
- Authored PRDs and user journey maps, and prioritized the MVP product roadmap using the MoSCoW framework, focusing on end-to-end itinerary generation and budget-constrained recommendations.
- Built and validated a functional GenAI prototype using LLM tool-calling APIs, testing prompt architectures and measuring user completion rates through usability testing.

ACHIEVEMENTS

- **Client/User First Mindset Pod Award – Meesho:** Led onboarding of Meesho's first enterprise account, later recognized as one of the team's top revenue-driving engagements.
- **Hackathon Runner-Up – Meesho:** Secured 2nd place company-wide within 3 weeks of joining, contributing AI-driven solutioning and GPT-based prompt engineering.
- **Bravo Award – Walmart:** Recognized for leading a system migration with a seamless, zero-disruption transition.

EDUCATION

Sathyabama Institute of Science & Technology *2017 – 2021*

Bachelor of Engineering – Computer Science, CGPA: 8.9 / 10.0

BITS School of Management (BITSoM) *2025 – 2026*

Product Management with Gen and Agentic AI
